ActivePresenter can also be used to convert Microsoft PowerPoint presentations to one of its output formats with lack of some animations and effects, convert between several video formats indirectly.

History

ActivePresenter has been developed by Atomi Systems Inc. since 2007. Version 1.0 was released in October 2008 and became available in online market six months later with three editions, including free of charge edition.

Editions

Three editions are available at different prices, each having the capabilities of lower ones, plus added features. The features of the various editions are compared in a table on the ActivePresenter Web site.

Free Edition

This edition is free of charge (freeware). It has most ActivePresenter features, but unrestricted export is limited to JPEG and PNG images, and WMV, AVI, MPEG4, WebM video formats, and SCORM. Other output formats are supported to demonstrate features, but an obtrusive watermark is added to output, and even with watermark it may not be used for any other purpose. Pre-2012 versions added watermarks to all exported output.

Standard Edition

This edition additionally allows exporting to series of images, videos, flash videos and documents. User can also export to Microsoft PowerPoint presentations, Adobe Flash or HTML5 simulations with watermark on them.

Professional

Edition

This additionally supports interactive simulations and quizzes in Adobe Flash .SWF or HTML5 output.
